

SETHNESS PRODUCTS COMPANY

BATCH CODING SYSTEM

SETHNESS PRODUCTS LIQUID CARAMEL COLOR

The batch code consists of two letters followed by six numerical digits as illustrated by the following example:

ZR032005
MFG. 02-05-09

The batch code contains the following information:

Z R 032 005
YR. M. No. PACK.

- (YR.)** The first letter of the code indicates the year of manufacture. "Z" indicates 2009, "A" indicates 2010, "B" indicates 2011, "C" indicates 2012, "D" indicates 2013, "E" indicates 2014. To prevent confusion, I O Q V X and Y are not used.
- (M.)** The second letter of the code indicates the month of manufacture according to the following code: January-E, February-R, March-N, April-A, May-T, June-D, July-H, August-K, September-S, October-F, November-J, and December-M.
- (No.)** The next three numerical digits indicate the sequential position of the batch during the month's production relative to the other batches of Caramel Color as identified in quality assurance and inventory control records.
- (PACK.)** The last three digits indicate the net packing volume according to the following code: 004-carton of 4x1 gallon, 005 5-gallon pail, 055 55 gallon-drum, 260 260-gallon tote, 270 270-gallon tote, 300 300-gal tote, 330 330-gallon tote.
- MFG.** The month and year of manufacture of the batch are also represented by the typical numerical notation of the calendar month and year, i.e., 02-05-09 – February 5, 2009.

Thus the illustration above indicates the 32nd batch of Caramel color manufactured during February 2009, and packaged in a 5-gallon pail.
