

SETHNESS PRODUCTS COMPANY

ABSENCE OF CHEMICALS IN SETHNESS CARAMEL COLORS

Sethness Caramel Colors are manufactured to meet the requirements listed in 21 CFR 73.85 (United States Code of Federal Regulations) and FCC (U. S. Food and Chemical Codex). The only chemicals used in the manufacture of Sethness Caramel Colors are those listed in the CFR and FCC. No other chemicals are used in the manufacture or come in contact with Sethness Caramel Colors. Sethness Caramel Colors are 100% Caramel Color as listed in our Ingredient Statement. Caramel Colors are GRAS (Generally Recognized As Safe) when used following GMP (Good Manufacturing Practices). There is no complete analysis of a Caramel Color that would include all potential chemicals and without testing data it would be improper to certify their absence or maximum concentration. However, Sethness Products Company can certify that only products listed in the CFR and FCC come into contact with Sethness Caramel Color.

A copy of 21 CFR 73.85 is attached.
